

ANSHUMAN TIWARI

Shahdol(M.P) — +91-8305909173 — anshumaaan.tiwari@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

PROFILE

Software Developer skilled in **Java, Spring Boot, and Flutter** building REST APIs and backend systems with minimal supervision. Strong foundation in OOP,focused on building scalable REST APIs, microservices, Docker-based deployment, and clean application architecture.

EDUCATION

Indira Gandhi National Tribal University (Central University)

Amarkantak (M.P)

July 2024 – July 2026

Master of Computer Applications (MCA)

CGPA: 9.08

SKILLS

Languages: Java, Dart Python, JavaScript, SQL

Backend: Spring Boot, Spring MVC, Spring Security (JWT, OAuth2), Hibernate, JPA, Flask, REST-ful APIs, Microservices

Mobile Development: Flutter, Dart, REST API Integration, State Management

Databases: MySQL, PostgreSQL, MongoDB

Frontend (supporting): Flutter, React.js, Next.js, Tailwind CSS

Independent Projects and Open-Source

Freelance / Open-Source Developer — Backend Engineer

Jan 2025 – Present

- **Engineered** a Placement Cell System using **Flask, MySQL, React** with role-based REST APIs for student registration, company listings, and admin dashboards; containerized with **Docker**.
- **Architected** an e-commerce backend with secure CRUD APIs, **JWT-based authentication**, product catalog management, and WhatsApp-based order integration.
- **Collaborated** with cross-functional teams on **GitHub** via feature-branching, pull request reviews,independently resolving merge conflicts with minimal oversight and strong time management across concurrent project deadlines.

PROJECTS

Medicare-Pro – Healthcare SaaS Management Platform

[GitHub](#)

Java, Spring Boot, Dart, Flutter, PostgreSQL, Docker

- **Built** secure REST APIs supporting **4+ healthcare workflows** including patient registration, appointment scheduling, medical records, and RBAC using **JWT authentication**.
- **Developed** a cross-platform **Flutter** application using **Dart** and Clean Architecture, delivering 5+ responsive healthcare portals with optimized state management.
- **Implemented** analytics dashboards and a scalable **SaaS** architecture to streamline healthcare operations and support data-driven decision-making.

FlowSentinel – Real-Time Network Inspection System

[GitHub](#)

Java, Spring Boot, PostgreSQL, Docker, Multithreading, GitHub Actions, React, Next.js

- **Engineered** a real-time .pcap traffic processor aggregating packets into flows via the **FiveTuple model** for scalable, high-throughput flow-level analytics across large-scale network pipelines.
- **Independently identified** a threading bottleneck and **implemented** concurrent packet processing using **Java multithreading**, cutting analysis latency; containerized with **Docker**.

CERTIFICATIONS

- **Java Concepts** – Infosys Springboard — **The Java Language** – LearnQuest (Coursera) — **Machine Learning in Retail** – Coursera Project Network
