

ANSHUMAN TIWARI

Shahdol (M.P) — +91-8305909173 — anshumaaan.tiwari@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

PROFILE

Detail-oriented **Business Analyst** with hands-on experience delivering end-to-end BA artefacts across healthcare SaaS and e-commerce domains. Combines strong **requirements engineering** and **Agile delivery skills** with a technical background in software development, enabling effective collaboration with cross-functional engineering teams.

EDUCATION

Master of Computer Applications (MCA)	CGPA: 9.12
Indira Gandhi National Tribal University (Central University), Amarkantak (M.P)	July 2024 – July 2026
Bachelor of Science – Mathematics & Computer Science	CGPA: 8.10
Indira Gandhi National Tribal University (Central University), Amarkantak (M.P)	July 2021 – July 2024

SKILLS

BA & Analysis: Requirements Elicitation, BRD, PRD, FRD, User Stories, Use Cases, Gap Analysis, SWOT, PESTLE, RTM, UAT, Process Mapping (AS-IS / TO-BE), Stakeholder Management, Agile Scrum
Tools: Power BI, Jira, Figma (Wireframes), MS Excel, SQL, Git
Technical (supporting): Java, Spring Boot, Python, REST APIs, MySQL, PostgreSQL, Docker, React.js

BUSINESS ANALYSIS PROJECTS

Medicare Pro – AI-Powered Smart Health Management System [GitHub](#)
Healthcare SaaS · Agile Scrum · Power BI · Jira · Figma

- Delivered **15 BA artefacts** for an AI-augmented multi-tenant hospital management platform covering BRD, Requirements Elicitation, Use Cases, User Stories with acceptance criteria, AS-IS/TO-BE process flows, Wireframes, Gap Analysis, SWOT/PESTLE, Stakeholder Communication Plan, Jira Backlog, Agile Sprint Roadmap, RTM, UAT, and Test Scenarios.
- Built a **Requirements Traceability Matrix** mapping **20 functional and non-functional requirements** end-to-end from elicitation through UAT sign-off across 7 Epics.
- Designed **AS-IS/TO-BE process flows** for 3 critical hospital workflows (patient registration, appointment booking, prescription processing), identifying key inefficiencies and digitisation opportunities.
- Created **4 Figma wireframes** (Patient Dashboard, Appointment Booking, Symptom Checker, Admin Panel) and produced Power BI KPI dashboards from raw datasets covering patients, doctors, appointments, and subscriptions.

Oyster Herbs – E-Commerce Digital Commerce Platform [GitHub](#)
E-Commerce · Power BI · Market Research

- Conducted full BA lifecycle for a **live client e-commerce website** (independently developed), delivering **9 professional documents:** BRD, Product Vision & Strategy, Market Research & Competitor Analysis, Customer Journey Mapping, PRD, Feature Prioritization & Product Roadmap, Business Process Improvement, Gap Analysis, and UAT Report.
- Performed **market and competitor research** for the Ayurvedic/herbal wellness segment, identifying digital commerce gaps and translating findings into a prioritized feature roadmap.
- Built **3 Power BI dashboards** (Customer Insights, Product Analytics, Product Performance) analysing real product, review, and category data to surface actionable business intelligence.

TECHNICAL PROJECTS

FlowSentinel – Real-Time Network Inspection System [GitHub](#)
Java, Spring Boot, PostgreSQL, Docker, Multithreading, GitHub Actions, React, Next.js

- Engineered a real-time .pcap traffic processor using the **FiveTuple model**; implemented concurrent packet processing with **Java multithreading** and automated builds via **GitHub Actions CI/CD**.

Freelance – Placement Cell System & E-Commerce Backend Jan 2025 – Present
• Built role-based REST APIs for a Placement Cell System (**Flask, MySQL, React, Docker**) and an e-commerce backend with **JWT authentication** and WhatsApp-based order integration.

AREAS OF INTEREST

BA Domains: Healthcare IT, E-Commerce, SaaS Product Analysis, Digital Transformation
Methodologies: Agile Scrum, Waterfall, Business Process Improvement, Requirements Engineering
Tools & Analytics: Power BI Dashboard Design, SQL-based Data Analysis, Wireframing & Prototyping.
