

ANSHUMAN TIWARI

Shahdol(M.P) — +91-8305909173 — anshumaaan.tiwari@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

PROFILE

Backend Software Developer skilled in **Java, Spring Boot, and distributed systems**, focused on building scalable REST APIs and high-performance microservices. Strong understanding of system design, database optimization, and clean architecture.

EDUCATION

Indira Gandhi National Tribal University (Central University)

Amarkantak (M.P)

July 2024 – July 2026

Master of Computer Applications (MCA)

CGPA: 9.12

SKILLS

Languages: Java, Python, JavaScript, SQL

Backend: Spring Boot, Spring MVC, Spring Security (JWT, OAuth2), Hibernate, JPA, Flask, RESTful APIs, Microservices

DevOps & Cloud: Docker, Git, GitHub Actions (CI/CD),

Databases: MySQL, PostgreSQL, MongoDB

Frontend (supporting): React.js, Next.js, Tailwind CSS

Independent Projects and Open-Source

Freelance / Open-Source Developer — Backend Engineer

Jan 2025 – Present

- **Engineered** a Placement Cell System using **Flask, MySQL, React** with role-based REST APIs for student registration, company listings, and admin dashboards; containerized with **Docker**.
- **Architected** an e-commerce backend with secure CRUD APIs, **JWT-based authentication**, product catalog management, and WhatsApp-based order integration.
- **Contributed** to open-source projects on **GitHub** via feature-branching, pull request reviews, and production-level code through collaborative development workflows.

PROJECTS

FlowSentinel – Real-Time Network Inspection System

[GitHub](#)

Java, Spring Boot, PostgreSQL, Docker, Multithreading, GitHub Actions, React, Next.js

- **Engineered** a real-time .pcap traffic processor aggregating packets into flows via the **FiveTuple model** for scalable, high-throughput flow-level analytics across large-scale network pipelines.
- **Implemented** concurrent packet processing using **Java multithreading** for low-latency analytics; containerized with **Docker** and automated build pipelines via **GitHub Actions CI/CD**.

AI-Powered Smart Health Management System

[GitHub](#)

Java, Spring Boot, PostgreSQL, Docker, JUnit 5, Mockito, Next.js, TypeScript, Tailwind CSS

- **Architected** REST APIs supporting **4+ hospital workflows** (patient registration, appointment scheduling, medical records, role-based access control) with **JWT-based authentication**.
- **Optimized** PostgreSQL schemas with efficient indexing; deployed via **Docker** and validated with **JUnit 5 + Mockito** achieving **80%+ code coverage**.
- **Integrated** AI-assisted dashboards for clinical decision-making within a scalable, modular SaaS-style architecture.

CERTIFICATIONS

- **Java Concepts** – Infosys Springboard — **The Java Language** – LearnQuest (Coursera) — **Machine Learning in Retail** – Coursera Project Network
